Engineers

ATTENTION:

Flynn Environmental will be installing monitor wells in the median, between the north and south lanes, in the area of Sheetz and Kuma's on Tuesday, March 29, 2011 and Wednesday, March 30, 2011. There will be lane closures both northbound and southbound on the inside lanes. The turning lanes will be open. Restrictions will be from 06:00 to 18:30 on Tuesday and beginning on Wednesday at 07:00 if the job is not completed on Tuesday.

**Bridge Preservation Projects**  
**Westmoreland County**

• **Bridge on Route 3021 (Webster Hollow Road) Closure and Detour**

**Uniontown** – PennDOT District 12 would like to advise motorists that a bridge on a section of Route 3021 (Webster Hollow Road) in Belle Vernon, Westmoreland County will be closed and detoured starting on April 1 at 7:00 AM through the end of May. The bridge is located between Fellsburg Road and Route 51. This closure is necessary so that the bridge can be replaced.

The detour uses Route 3008 (Fellsburg Road), Route 51 and back to Route 3021 (Webster Hollow Road).

- **Route 51 – Rostraver Twp.**

This project is scheduled to begin on April 4 and will tentatively continue until Mid October while crews perform rehabilitation work which will include concrete repairs to the substructure, compression seal replacement, full superstructure painting and other miscellaneous construction.

Single lane restrictions will be necessary on Route 51 and Interstate 70 and will be in place at night only between the hours of 8 p.m. and 7 a.m., Sunday evening through Friday morning. No work will be permitted between 7 a.m. Friday and 8 p.m. Sunday. Motorists should slow down and drive with caution when entering the work area.

- **Route 3011 (Rehoboth/Finley Rd.) – Rostraver Twp.**

This project is scheduled to begin mid June and will continue through mid-November while crews perform rehabilitation work which will include partial removal of deck surface, placement of latex overlay on deck, repairs to bearing pedestals, placement of new strip seal dams, approach slabs, full superstructure painting and other miscellaneous repairs.

Repair of this bridge structure will be performed in “halves” and will require a long term single lane closure. Traffic will be regulated with a temporary traffic signal. Motorists should slow down and drive with caution when entering the work area.
